DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Hirashima et al.

Hirashima et al. disclose an expression cassette (mRNA) [first strand] targeted by different micRNA [second strand] that target various regions of a bacteriophage. In Figure 1 it can be seen that fragments A, B, C, and D bind to regions of the mRNA. The mRNA clearly contains sequences that would be considered sequences that encode proteins of interest that are down stream of sequences that would be flanking sequence (i.e. encode a target sequence/molecule). The fragment "B" binds to a 3' region of the RT and a 5' region of the replicase gene. The prior art meets all of the limitations of the claims since, for example, the claim does not require that the target molecule be different from the flanking sequence and further since the B of the prior art targets two different regions of the mRNA.

Applicant arguments filed 5/13/05 have been fully considered but they are not persuasive. Applicant argues that the prior art differs from the invention of claim 4 requires that the first strand comprise both the 5' and 3' regions of the RNA encoding the protein of interest simultaneously. The claim does not provide for such limitations.

Art Unit: 1635

The claim 4 only requires only that the strand have a 5' portion and a 3' portion. The context of the claim does not require the designated 3' and 5' portions are of the part of the strand that encodes the protein of interest.

Claims 1, 3, and 7-12 are allowed.

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
